

HERBICIDE TOLERANCE

800-369-7833
wyffels.com

2011

In field trial observations, crop injury was noted in some hybrids when a rimsulfuron-containing herbicide was applied. Herbicides that contain rimsulfuron include Accent Gold®, Basis®, Basis Gold®, Require™ Q, Resolve® Q, and Steadfast® ATZ.

* relative maturity

N = Normal

Research field trial observations indicate normal herbicide tolerance with this herbicide/hybrid combination when label directions are followed.

C = Caution

Research field trial observations indicate some risk of crop injury with this herbicide/hybrid combination. If rimsulfuron herbicide is used, label directions should be followed closely with emphasis to environmental conditions, crop growth stage, and herbicide use rates.

W = Warning (not recommended)

In research field trials increased risk of crop injury was observed with this herbicide/hybrid combination.

NR = Not rated

Additional observation is needed to evaluate this herbicide/hybrid combination.

Wyffels Hybrids Inc makes no warranty regarding the herbicide crop response information presented here.

Always read and follow all herbicide label instructions and precautions.
