PLACEMENT / MANAGEMENT

SOIL ADAPTABILITY

drought prone.

RATING

VG

Е

Е

VG

NR = not recommended.

Performs well on light to heavy soils and poorlydrained soils. Push populations for maximum yields. Medium plant structure and late-season intactness make this hybrid a great late harvest option.

SOIL CATEGORY

LIGHT SOILS – LOW CEC (<10); OM <1.5%;

low water-holding capacity; non-irrigated

sand; timber soils; marginal productivity;

MEDIUM SOILS – CEC 11–18; OM 1.5-3.5%; well-drained; silt loam; high productivity.

DARK SOILS – HIGH CEC (>18); OM >3.5%; well-drained; dark colored soils.

POORLY-DRAINED – Soils that have the potential to remain saturated for prolonged periods; side hill seeps; gumbo; muck.

5

E = excellent, VG = very good, G = good, F = fair,

CONTINUOUS CORN MANAGEMENT

- If corn rootworm management is needed, consider a SmartStax[®] hybrid.
- Monitor for foliar diseases and apply fungicide as needed.

LEGEND: E = early for maturity, A = average for maturity, L = late for maturity; M = medium, MS = medium short, MT = medium tall, T = tall; H = high, MH = medium high, ML = medium low; F = flex, SF = semi-flex, D = determinate, SD = semi-determinate. Numerical ratings are based on comparisons among Wyffels hybrids of like maturity where 1 = Low, 5 = Avg, and 9 = High expressions of a trait.

ZONE ADAPTABILITY

2 3

4 5

* N = Normal tolerance to rimsulfuron-containing herbicides when label directions are followed.

Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. Roundup Ready[®] technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup[®] brand graincultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate. *Bt.* products may not yet be registered in all states.
