### SOIL ADAPTABILITY

| RATING | SOIL CATEGORY                                                                                                                                     |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| E      | <b>LIGHT SOILS</b> – LOW CEC (<10); OM <1.5%; low water-holding capacity; non-irrigated sand; timber soils; marginal productivity; drought prone. |
| E      | <b>MEDIUM SOILS</b> – CEC 11–18; OM 1.5–3.5%; well-drained; silt loam; high productivity.                                                         |
| E      | <b>DARK SOILS</b> – HIGH CEC (>18); OM >3.5%; well-drained; dark colored soils.                                                                   |
| E      | <b>POORLY-DRAINED</b> – Soils that have the potential to remain saturated for prolonged periods; side hill seeps; gumbo; muck.                    |

E = excellent, VG = very good, G = good, F = fair, NR = not recommended.

LEGEND: E = early for maturity, A = average for maturity, L = late for maturity; M = medium, MS = medium short, MT = medium tall, T = tall; H = high, MH = medium high, ML = medium low; F = flex, SF = semi-flex, D = determinate, SD = semi-determinate. Numerical ratings are based on comparisons among Wyffels hybrids of like maturity where 1 = Low, 5 = Avg, and 9 = High expressions of a trait.

### PLACEMENT / MANAGEMENT

An exciting hybrid with a strong disease package. Maintains performance under stress. Semi-flex ear adapts to a range of planting rates.
