## W9097<sub>RIB</sub>

### LABELED FOR POSTEMERGENCE APPLICATION

| Roundup<br>(glyphosate) | Liberty<br>(glufosinate) | Enlist<br>(2,4-D choline) | Assure II<br>(FOP) |
|-------------------------|--------------------------|---------------------------|--------------------|
| ✓                       | ✗                        | ✗                         | ✗                  |

- Outstanding yield potential across environments
- Versatile placement across soil types
- Strong stalks with low green snap risk
- Semi-flex ear works well over a wide range of populations

### CONTINUOUS CORN MANAGEMENT

- Recommended for fields with low to moderate corn rootworm pressure.
- Use on fields with a low history of Goss' wilt.

LEGEND: E = early for maturity, A = average for maturity, L = late for maturity; M = medium, MS = medium short, MT = medium tall, T = tall; H = high, MH = medium high, ML = medium low; F = flex, SF = semi-flex, D = determinate, SD = semi-determinate. Numerical ratings are based on comparisons among Wyffels hybrids of like maturity where 1 = Low, 5 = Avg, and 9 = High expressions of a trait.

### PLACEMENT / MANAGEMENT

Very high yield potential with flexibility to be placed over variable soil types. Good northern movement as a full-season option. Above average tar spot tolerance

### SOIL ADAPTABILITY

| RATING | SOIL CATEGORY                                                                                                                                     |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| E      | <b>LIGHT SOILS</b> – LOW CEC (<10); OM <1.5%; low water-holding capacity; non-irrigated sand; timber soils; marginal productivity; drought prone. |
| E      | <b>MEDIUM SOILS</b> – CEC 11–18; OM 1.5–3.5%; well-drained; silt loam; high productivity.                                                         |
| E      | <b>DARK SOILS</b> – HIGH CEC (>18); OM >3.5%; well-drained; dark colored soils.                                                                   |
| E      | <b>POORLY-DRAINED</b> – Soils that have the potential to remain saturated for prolonged periods; side hill seeps; gumbo; muck.                    |

E = excellent, VG = very good, G = good, F = fair, NR = not recommended.

### RECOMMENDED PLANTING RATE

| PRODUCTIVITY LEVEL |           |           |
|--------------------|-----------|-----------|
| HIGH               | MODERATE  | LOW       |
| 36-40,000          | 34-38,000 | 32-36,000 |

### PLANT PHYSIOLOGY AND HEALTH

|                       |         |
|-----------------------|---------|
| GDU'S TO POLLINATION  | 1410, A |
| DAYS TO POLLINATION   | 76      |
| GDU'S TO BLACK LAYER  | 2830, A |
| EARLY VIGOR           | 8       |
| PLANT HEIGHT          | MT      |
| STALK STRENGTH        | 8       |
| ROOT STRENGTH         | 7       |
| GREEN SNAP RESISTANCE | 8       |
| DROUGHT TOLERANCE     | 8       |
| STAYGREEN             | 7       |

### EAR/GRAIN CHARACTERISTICS

|             |       |
|-------------|-------|
| EAR FLEX    | SF    |
| EAR LENGTH  | 7     |
| EAR HEIGHT  | M     |
| KERNEL ROWS | 16-18 |
| TEST WEIGHT | 7     |
| DRYDOWN     | 7     |

### PEST/DISEASE RATINGS

|                          |   |
|--------------------------|---|
| GOSS' WILT TOLERANCE     | 6 |
| GRAY LEAF SPOT TOLERANCE | 7 |
| NLB TOLERANCE            | 7 |
| ANTHRACNOSE TOLERANCE    | 9 |
